

# BOGERFLØYTA THE 1<sup>ST</sup> OF AUGUST 2020

We drove this road. The trip took about 25 minutes each way.

This is by Gjemselund bridge that crosses [Glomma](#). It was opened in 1991.

To the left at the end of the bridge, four new apartment blocks have been built, Dr. Juells Park.

Graffiti in the center of the town.

This road leads to Bogerfløyta.

There is a dam at the end of Bogerfløyta.

The area around Bogerfløyta is a popular hiking area for people in [Kongsvinger](#). There is a welfare association, Bogerlia Vel, which is committed to keeping the area around the lake in order. They have also made a bathing jetty with a bathing ladder, so that it will be easier to get down and up from the water.

Overflow in the dam.

Here we see the dam and the lake inside.

This is the bathing jetty.

Paths are made when people travel in the area.

Below are various photos from the area around the lake.

This is [resin](#).

The woodpecker has been here in this rotten tree.

Attacks of bark beetles.

Blueberries.

Bilberries.

More Bilberries.

Heather.

Cranberries.

Cranberries.

Spruce with lichen.

Calla.

Angelica.

Fungus.

I'm going to take more pictures.

We sit and look at the view before we drive home again.
